

Background findings in commonly used rodents

Piper Meigs Treuting, DVM, MS, DACVP

treuting@uw.edu

Pfizer, Inc. & Adjunct Professor, Dept. Of Comparative Medicine, University of Washington
School of Medicine.

Keywords: Mouse, Rat, Histopathology, Anatomy, Comparative Medicine

This presentation is designed to introduce attendees to the unique normative anatomy and background findings in commonly used rodent strains and the perils of do it yourself (DYI) pathology.
